

Shipment Track

To effectively track your shipments using the **Shipment Tracking** page in the carrier portal, follow along with this video or the steps below. Shipment Track is where updates are entered on all awarded shipments, including shipment status, PRO #, actual pickup date, and actual delivery date.

- Select **In Transit** from the status filter to further update the shipment. To update to delivered, click on the pencil icon again. Update the delivery status to **Delivered** and enter your stop date and in and out times as you did with the pickup stop. Once this has been completed, click Update. The shipment will now be in Delivered status. This will update all shipment details for the customer to see.
